

A₁

Figure 9 is a schematic representation of the P501S protein (SEQ ID NO:113) showing the location of transmembrane domains and predicted intracellular and extracellular domains (SEQ ID NO:552-575).

Attached is a page entitled "Version with Markings to Show Changes Made."

Also enclosed is a substitute specification. The specification as filed inadvertently did not include page and line numbers. The substitute specification is identical to the specification as filed on November 12, 1999 except for addition of the page and line numbers. No new matter is added.

All of the claims remaining in the application are now clearly allowable. Favorable consideration and a Notice of Allowance are earnestly solicited.

Respectfully submitted,
Seed Intellectual Property Law Group PLLC
